ReadMe File

Introduction to My Web with HTML and CSS:

My web pages are inspired by iPhone 14 theme, especially the dynamic island feature. Each of the four web pages shares nothing in common except the header and footer therefore I have made four different CSS files for each web page which I'll discuss later in this file. To make my Webpage more responsive with Phones and tablets as well, I have to make separate CSS files for each HTML file. So in total, there are 12 CSS files for 4 HTML. Talking about semantic tags, each and every HTML file is properly tagged with semantic tags as required in assignment 1. All the CSS files are clear and there is no warning or error in the 12 CSS files you find prof [here](#). **(Note: In HTML files you can find errors and I Perpasly kept those errors because If I solve those errors, it radically changes my webpage look and I don't want that. The error was about <a> tag is not allowed in <bottom> and the same for <h1> tags and not a single error other than those.)**

Home Page:

HTML: HomePage.html

CSS: HomePageStyle.css - for laptops/monitors

CSS:HomePageTablet.css - for tablet

CSS:HomePagePhone.css - for Phone

- Credit: Only Dev Patel
- Features Credit: Only Dev Patel
- This Page was Created, designed, organized, and completed by Dev Patel only.

Description: This Page is my home page where users can find about Professor name and TA name with a little description and Read More direct links for each webpage like Project, AboutMe and Contact Me Page. I have also added some quotes for more content. The background color is linear-gradient and the colors are inspired by [iPhone 14 wallpaper](#). As mentioned above all CSS files are error-free.

Project Page:

HTML: ProjectPage.html

CSS: ProjectPageStyle.css - for laptops/monitors

CSS:ProjectPageTablet.css - for tablet

CSS:ProjectPagePhone.css - for Phone

- Credit: Only Dev **Patel**
- Features Credit: Only Dev **Patel**
- This Page was Created, designed, organized, and completed by Dev Patel **only**.

Description: This page is my Project page where users can find information about the projects I completed during my first year of university with the project name, course and professor name, year and semester, and what the project was about information. The background color is linear-gradient and the colors are inspired by [iPhone 14 wallpaper](#). As mentioned above all CSS files are error-free.

About Me Page:

HTML: AboutMePage.html

CSS: AboutMePageStyle.css - for laptops/monitors

CSS:AboutMePageTablet.css - for tablet

CSS:AboutMePagePhone.css - for Phone

- Credit: Only Dev **Patel**
- Features Credit: Only Dev **Patel**
- **Image Zoom** Feature inspired by: w3schools
- This Page was Created, designed, organized, and completed by Dev Patel **only**.

Description: This page is my AboutMe page where users can find information about my small introduction and A 1-minute introduction video as required in assignment 1. For the video, I have added the play and pose button. The background color is linear-gradient and the colors are inspired by [iPhone 14 wallpaper](#). As mentioned above all CSS files are error-free.

Contact Me Page:

HTML: ContactMePage.html

CSS: ContactMePageStyle.css - for laptops/monitors

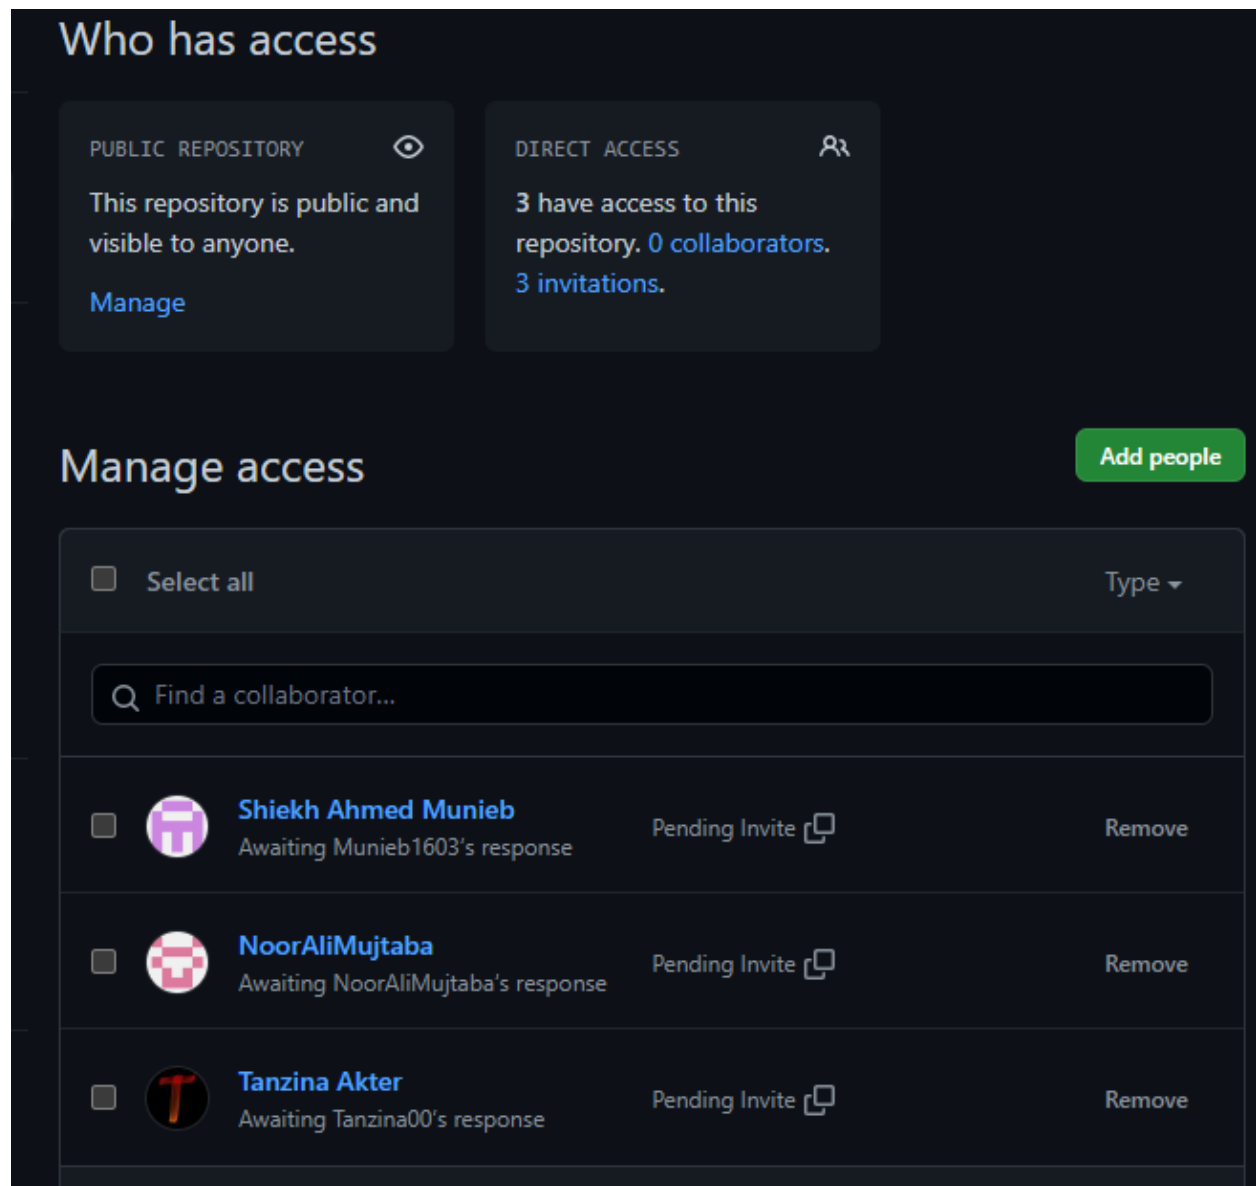

CSS:ContactMePageTablet.css - for tablet

CSS:ContactMePagePhone.css - for Phone

- Credit: Only Dev **Patel**
- Features Credit: Only Dev **Patel**
- This Page was Created, designed, organized, and completed by Dev Patel **only**.
